

Extended Lip Bucket

Some common uses: *Excavating, Landscaping, Construction, General Purpose*

Part # BEL-(width) Example: BEL-60 is a 60" Extended Lip Bucket

Recommended for John Deere and New Holland skidloaders

3/4" X 6" Cutting Edge Sides for Reinforced Corners

3" Longer Floor Allows the Operator to See Cutting Edge Better

BEL-Series

Berlon's *Extended Lip Buckets* include all the features of the B-Series with an additional 3" in depth. This extra 3" allows the operator of the machine to see the cutting edge with ease. The BEL-Series buckets are especially recommended if used in conjunction with New Holland or John Deere skidloaders.

Dimple Plate

Standard on all Berlon *Extended Lip Buckets* is a heavy duty, reinforced dimple plate. With structurally formed and individually welded "dimples", the BEL-Series provides unparallel strength and durability.

The innovative Berlon *Extended Lip Bucket* features a 3/4" x 6" cutting edge with holes, a radius kick-out plate, a sharp edge for back dragging, heavy duty steps and a 7 GA steel dimple plate. The *Extended Lip Buckets* come standard with a MPUF-1 mounting plate and powder painted black. They are available in 60", 66", 72", 78" and 84" widths to suit nearly any application. Berlon's buckets have superior strength, versatility and durability; proving *Berlon builds buckets the way they should be built!*
