

Lift Boom

Part # BLB

Specifications

Weight: 221 Lbs

Lifting Capacity: 2000 Lbs

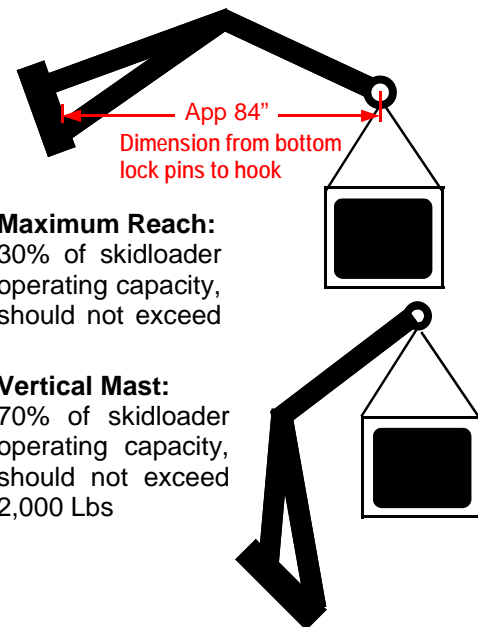

Berlon's heavy duty **Lift Boom** is sure to become one of the handiest labor (and back) savers in your operation. Its unique, double reinforced main mast provides superior strength while keeping "dead weight" to a minimum. Rated at 2000 Lbs, it is the perfect compliment to your skidloader. The convenient built in chain tray allows you to carry chains and lift straps with you to the job; and the forward "offset" design allows plenty of access to your target, while still maintaining superior clearance margins at the front of the machine. The **Lift Boom** is powder painted and comes standard with a MPUF-3.

The Berlon **Lift Boom** is especially handy in situations such as:

- *Lifting/transporting nursery stock*
- *Placing/removing concrete forms and bracing*
- *Loading/unloading skidloader attachments*

MAXIMUM LOADS THAT CAN BE LIFTED SAFELY

Warning: For operator safety, **DO NOT** exceed maximum 30% lifting/tipping capacity of your skidloader at maximum reach.
All people other than the operator must stand clear while attachment is in use.
DO NOT use for overhead and/or human lifting.
