

Bolt On Toothbar Over Bolt On Cutting Edge

Part # BOTBOE-(bucket inside dimension) Example: BOTBOE-60 is a 60" Bolt on Tooth Bar Over Bolt On Cutting Edge

FOR BERLON BUCKETS ONLY

Berlon ***Bolt On Toothbar Over Bolt on Cutting Edges*** have many valuable features such as easy on, easy off. They also have no V-groove to pack tight with mud which, when dried, turns into a concrete like material. The tooth bars are available in **ALL SIZES** for Berlon buckets with bolt on cutting edges.

Berlon uses a heavy duty shank with fabricated, replaceable teeth, held on by flex pins.

Berlon ***Tooth Bars*** have a built in adjustment to pull the teeth tight.

PULL UP BOLT DESIGN DOING ITS JOB!

Berlon ***Toothbar for Bolt On Edge*** installed on a bucket with a bolt on cutting edge.

Teeth are pulled tight to the edge for a snug fit. This adjustable design will help even as the cutting edge wears.
