

Fork Bucket

Part # FB

***TRANSFORM YOUR BERLON PALLET FORKS INTO A
BERLON FORK BUCKET!***

Pictured here with (8) forks. Spacing between each fork is 1 1/2".

Turn your Berlon pallet forks into a heavy duty **Fork Bucket!** All you need to do is add forks, sides and a back to your Berlon fork frame! This makes an excellent unit for picking rocks, removing concrete and also digging in clay and hard pan dirt. Just use this bucket for hard work, then take it apart to use it for pallet forks again! The **Berlon Fork Bucket** is available with any Class II size forks (42", 48", 54", 60") and comes standard with a MPUF-1 mounting plate. The overall width is 56" and is powder painted black. Like the Berlon pallet forks, the unique carriage design allows operators to easily get in and out of the skidloader.

**Note: Total lift capacity must be based on the working capacity of the SKIDLOADER!
NOT the capacity of the forks or the fork frame!**

Suggested List Price Pg 955
