LP-72H

SCARIFIER
TEETH IN
THE DOWN
POSITION

LP-72B

Berlon Land Planes make it easy to level out uneven ground, break up hard soil, remove rocks and unwanted material or grade a surface. With a 75" wide x 68" deep frame, the **Land Plane** can cover a wide area in a short period of time. The expanded metal feature assists in breaking down dirt clods. The scarifier teeth option across the back is hydraulically adjustable to allow you to control the depth of the teeth. Also, with uniquely placed ½" x 4" bolt on cutting edges, dirt will smoothly move back and forth within the outer edges. The **Land Plane** also features a bucket carrier which will allow you to save trips back and forth across the job site and also save on space when transporting the attachments. As you can see, the **Berlon Land Planes** come in different styles and sizes with multiple options and therefore is a great skidloader attachment for the job site.
