The Berlon ***Shaker Bucket*** is uniquely designed to deliver separation of material. With the Berlon ***Shaker Bucket***, you can save time and money by screening top soil on the job rather than buying it and hauling it in. For pipe bedding, rather than buying sand or gravel, make your own material! A hydraulically driven motor, heavy duty bucket and a screened bottom perform this task quickly and efficiently. The ***Shaker Bucket*** comes standard with a MPUF-1 mounting plate. It is available in 66", 72" & 84" widths. The screened bottom is available in 5 different sizes to meet your particular application.
