

Tree Shear - 20"

Part # TSH-20

The **20" Tree Shear** continues the proven tradition of the hydraulic tree shear line. It will cut up to a 20" diameter hardwood tree in one bite. **The Tree Shear** can be used anywhere as a valuable tool for clearing trees - everything from forest harvesting and thinning to cleaning up overgrown pastures.

Trees too large for the 12" tree shear can now be easily cut at ground level in one move. The **Tree Shear** is built on thousands of hours of experience to develop a heavy duty piece of equipment with low maintenance and trouble free operation.

Options Available: Grapple, Sprayer, Swivel

Features

- Will cut large clumps of thick brush
- Leaves minimal ground disturbance
- Includes a brush guard
- Approximately four cycles per minute
- 3" pin with hardened bushings
- Adjustable blades which can be sharpened or replaced

Specifications

Weight: 1900 Lbs

Flow Required: Minimum 10 Gallons/Minute

Hydraulic Cylinders: 6" Bore, 10" Stroke

Hydraulic pressure: 2600 PSI Recommended

Minimum 2200 PSI to

Maximum 5000 PSI

Blades: Machined 1" high-carbon steel

Standard Mount: MPUF-3

**HOSES INCLUDED. COUPLER KIT SOLD SEPARATELY
