

# Tree Shear Sprayer Option

Part # TSPY

The **Tree Sprayer** option comes with a heavy duty 4 3/4 gallon tank located on the front of the shear. The tank features the fill cap on top and a drain plug on bottom.

**Available for 5", 12" or 20" Shears!**

The **Tree Sprayer** also features a 12 volt DC pump which is located on the back side of the tank. The nozzle is located in the enclosed round tip guard on the back of the shear. It features a drip proof screen located inside and the nozzle can be adjusted for the size of the spray pattern desired. The tip is aimed toward the front of the shear and sprays the cut root exposed underneath the blades when the shear is raised 12"-18" and the rocker switch is activated.
