

# Utility High Back Bucket

Some common uses: *Manure, Slurry*

Part # UTHB-(width) Example: UTHB-60 is a 60" Utility High Back Bucket

To make this a New Holland Manure/Slurry Style Bucket use MPUF-5 or Different Angle

**3/4" X 6" X 6" High Cutting Edge Sides for Reinforced Corners & a Heavier Metal Wear Strip for Scraping Along Curbs.**

## UTHB-Series

If you need an extra capacity bucket, then the Berlon **Utility High Back** is the right choice. It is perfect for manure and slurry, but also works great with bulky material. They are available in widths of 60", 66", 72", 78" and 84" and have different mounts to suit your skidloader needs.

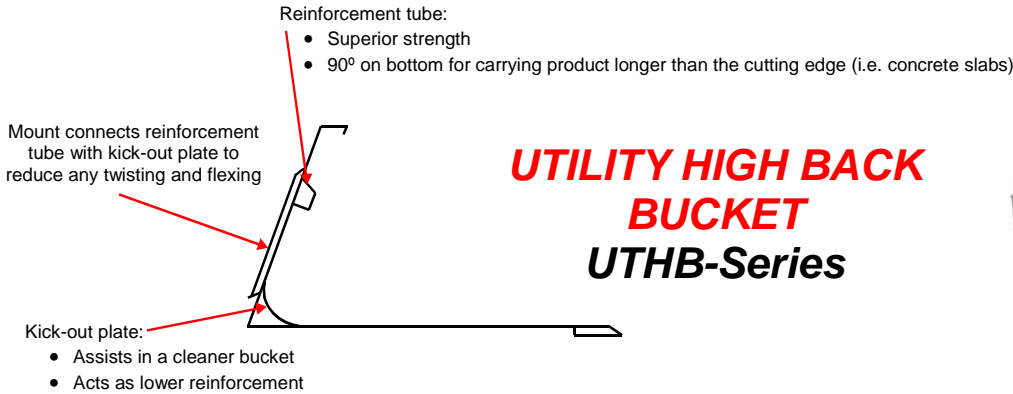

The **Utility High Back Buckets** feature a fully welded body and a radius kick-out plate for easier clean out and maximum strength. The back outside corner is sharp which increases the strength of the bucket and allows for ease in back dragging. The **Utility High Back Bucket** comes standard with wear bars, 3/4" x 6" cutting edge, top reinforcement tube, 2 heavy duty steps, MPUF-1 mounting plate and powder painted black. All these features show that **Berlon builds buckets the way they should be built!**

Suggested List Price Pg 918-919

# Why a Berlon?

## UTILITY HIGH BACK BUCKET UTHB-Series

### 14 MAIN REASONS:
