 84" Bucket - 8 Teeth
 96" Bucket - 10 Teeth

WET-1

The **WET-1** tooth is a light duty, economical tooth. The **WET-1** tooth weighs 2.5 Lbs including the shank. The overall length of the tooth is 9" and the usable length of the tooth is 5".

WET-2 HD

The **WET-2HD** tooth is a heavy duty, stronger version of the WET-1 tooth. The **WET-2HD** tooth weighs 6 Lbs including the shank. The overall length of the tooth is 10" and the usable length of the tooth is 6 1/2".

BERLON'S WELD ON TEETH ARE WELDED FLUSH WITH THE BOTTOM OF THE CUTTING EDGE

Berlon's **Weld on Teeth** can be welded onto most Berlon Buckets. The amount of teeth and the spacing between teeth can be set to any desired amount allowing you to customize your bucket to your specific needs. Buckets ordered with teeth come standard without holes in the cutting edges. Holes are optional.
